RWP KZN, has been providing services to the built environment for more than thirty years from our offices in Durban. We are a Level Two Black Empowered Entity with 52% Black Ownership and a 125% Procurement Recognition Level. Our firm employs 11 technical staff of which 6 are Project Engineers or Directors. Our firm is ISO 9001 certified with member affiliation to the Green Building Council of South Africa.

We offer the full scope of consulting electrical and electronic engineering services for the built environment and specialize in the following types of projects :

- Green-Star Rated Office Buildings
- Shopping Centres and Mixed Use Developments
- Warehouses and Distribution Centres
- Data Centres
- Schools & Student Residences
- Hospitals
- Hotels and Residential Apartment Blocks
- Vehicle Dealerships and Petrol Stations
- Residential Housing Estates
- Township Reticulation

EXPERTISE :-

- Feasibility Studies
- Medium and Low Voltage Electrical Building Services
- Standby Diesel Generators and UPS Systems
- Fire Detection, Background Music, Evacuation, Address and Gas Protection
- Access Control and CCTV Design
- Structured Power and Data Systems
- 11kV Sub Station Design
- Renewable Energy Systems

All projects are implemented under the direct supervision of a Director. The practice prides itself on the fact that all Project Directors are first and foremost Electrical Engineers who are actively involved with all aspects of their projects. We exercise financial control from project inception to final account and report variances on a monthly basis. Our designs are structured to suit our client's specific needs whilst applying optimum proven technology within the constraints of the budget allowance.

OUR ATTRIBUTES :-

- Black Economic Empowerment
- ECSA Registered Commitment & Undertaking
- Proven Track Record
- Technical Competency
- Resourcefulness, Responsiveness, Reliability
- Problem Solving
- Quality Control
- Cost Effective Design & Cost Control
- Timeous Completion
- Realistic Approach to Green Building Design
- Optimal Application of Technology
